The Ruhr area, one of Europe’s largest metropolitan regions, offers attractive career opportunities for excellent scientists and scholars from around the world. In 2021, Ruhr-Universität Bochum, TU Dortmund University and the University of Duisburg-Essen established the Research Alliance Ruhr to bundle their cutting-edge international research on the most urgent challenges facing humankind. There will be four research centers and a college. This is just the latest chapter in our long-standing collaboration as the University Alliance Ruhr. Ruhr-Universität Bochum has more than 250,000 researchers and 120,000 students in the heart of Germany.

As part of the Research Alliance Ruhr, the Research Center Trustwor- thy Data Science and Security (RC Trust) is seeking to fill the following position at the Department of Statistics of TU Dortmund University as soon as possible:

**Professorship (Open Rank: W3 or W2 tenure track to W3) for Causality**

**Your Responsibilities**

The person selected to hold the new professorship for causality will specialise in research and teaching in the fields of causal analysis and inference for the next generation of statistical, machine learning and artificial intelligence methods. The teaching load is reduced to four weekly hours per semester. The successful candidate will contribute to English-taught courses in statistics or data science.

**Your Qualifications**

We are seeking an outstanding scientist who holds an excellent PhD, has experience in applying third-party-funding and has published in relevant and highly ranked international venues. These should be at least one of the following areas:

- Causal Discovery and Structure Learning
- Causal Machine Learning
- Causal Modelling and Inference
- Propensity Score and Treatment Effects
- Probabilistic Graphs or Structural Equation Models

Applicants should complement the research activities of the RC Trust and the Department of Statistics and be willing to contribute to interdisciplinary collaborative research projects and collaborations within and outside the RC Trust and the Universities of the Research Alliance Ruhr. Willingness to acquire third-party-funds is expected. Potential applications include but are not limited to life sciences, social sciences, health, economics, logistics or engineering. For the W3 professorship, continuous publication activities in relevant and highly ranked international venues in the recent years as well as the successful and independent acquisition of research projects or competitive third-party-funds including cooperative joint research collaborations are mandatory.

Strong social and leadership skills and willingness to participate in academic self-administration complete your profile.

In the case of the W2 professorship with W3 tenure track, the suc- cessful candidate will initially be appointed as a temporary civil servant for five years. At the end of this five-year period at the latest, the tenure track will lead to continued employment as a tenured W3 university professor, provided that the necessary aptitude, competence and performance have been demonstrated and that the legal requirements pertaining to Section 38 of the North Rhine-Westphalia Higher Education Act (HG NRW, Gesetz über die Hochschulreform in Nordrhein-Westfalen) are met.

In addition, the recruitment criteria of Sections 36 and 37 of the North Rhine-Westphalia Higher Education Act apply.

**Attractive Environment**

The professorship will be part of the newly established Research Center Trustworthy Data Science and Security. The Center will en- able research that connects psychology, computer science, statistics and cyber security in order to empower people to understand, control and verify artificial intelligence technology as well as modern machine learning in (semi-)automated decision making.

The Research Center is located to all three partner universities of the University Alliance Ruhr. We offer an excellent research environment and attractive opportunities for collaboration with renowned international, national, and regional partners. The professorship advertised here will be closely associated with the department of computer science and statistics as well as the Dortmund Data Science Center (DoS5c) at TU Dortmund University.

These institutions enjoy an excellent national and international reputation in the fields of basic and applied machine learning research. These core issues have been consolidated in numerous interdisciplinary research collaborations among many fields of expertise. Research professors involved departments have a strong track record of acquiring major extramural support for collaborative research funds in the area of data science and artificial intelligence.

**Your Application**

If you are interested in the position, please send your application by a single PDF file by August 5, 2022 to:

dekanat.statistik@tu-dortmund.de

details on the application process and the preparation of application docu- ments can be found here:

**Diversity**

The Ruhr-Universität promotes diversity and equal opportunities. We strive to significantly increase the percentage of women in research and teaching and therefore welcome applications from female academics. We give preference to severely disabled applicants if their qualifications meet the requirements.
